Dear Sir,

About 2 weeks ago, the morning of April 27th at 4:15 A.M. I saw a light red object in the sky. It was standing still, above the tree line, in the East. I watched it for about 5 minutes, when it faded out - came back on and faded out again. I continued to watch, but did not see it again. I then called the State Police at Ashland to see if any one else had seen this. The State Police-man at first told me that he had had no reports - but after checking with another police man - said there had been reports of people seeing something over Grant, Ohio. I then read in the Ashland Daily Independent, on April 29th, of the reports of people seeing something at about 2 A.M. in

(possibly Venus) (105° Az 15° el) (send 164)

I have received the paper  
- but can't say anything about  
about it, and I would like  
to know what it was. I  
would appreciate any information  
about it.

Thank you.

Mrs. [REDACTED]

I am sending this to the  
Base Commander - because I  
don't know who to send it to.  
If you cannot forward it to  
the proper person, I would  
appreciate an address, so I  
can write again.

Thank You

26. In order that you can give as clear a picture as possible of what you saw, describe in your own words a common object or objects which, when placed up in the sky, would give the same appearance as the object which you saw.

*This object was larger than any  
star - maybe 2 or 3 large stars  
together.*

27. In the following sketch, imagine that you are at the point shown. Place an "A" on the curved line to show how high the object was above the horizon (skyline) when you *first* saw it. Place a "B" on the same curved line to show how high the object was above the horizon (skyline) when you *last* saw it. Place an "A" on the compass when you *first* saw it. Place a "B" on the compass where you *last* saw the object.

28. Draw a picture that will show the motion that the object or objects made. Place an "A" at the beginning of the path, a "B" at the end of the path, and show any changes in direction during the course.

29. IF there was MORE THAN ONE object, then how many were there? \_\_\_\_\_  
Draw a picture of how they were arranged, and put an arrow to show the direction that they were traveling.

30. Have you ever seen this, or a similar object before. If so give date or dates and location.

31. Was anyone else with you at the time you saw the object? (Circle One) Yes

No

31.1 IF you answered YES, did they see the object too? (Circle One) Yes

No

35. Information which you feel pertinent and which is not adequately covered in the specific points of the questionnaire or a narrative explanation of your sighting.

I was passing a window - glanced out - and saw a light red object in the sky - where there are never any stars & there wasn't any stars on this night. It was up above the tree line & below some low hanging clouds. As there has never been any light of any kind in that vicinity in the 8 years we have lived here - I put my glasses on and watched it until it went out. Then I called the State Police at Oakland.
